

# Myths vs Reality

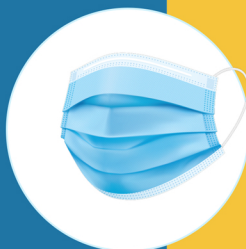

Let's fight misinformation with the truth! Visit [poderensalud.org](http://poderensalud.org) for accurate information about COVID-19 for the Latino community

If you get the COVID-19 vaccine you will contract the virus

The currently approved COVID-19 vaccines authorized for use in the U.S. do not contain a live virus that causes COVID-19

I don't need to wear a mask after getting the vaccine

Wearing a high-quality mask along with getting the COVID-19 vaccine helps protect you and those around you by reducing the chance of getting COVID-19

The vaccine can change your DNA

There is no way that the vaccine can become DNA or change human cells. After the body produces the immune response, all ingredients of the vaccine are discarded

The COVID-19 Vaccines causes infertility

Federal agencies such as the CDC will never approve a vaccine that would affect a person's capacity to conceive

COVID-19 Vaccines contain microchip

Microchips have never been used in a vaccine before. The COVID-19 vaccine has been created to protect your immune system from the COVID-19 virus
